Monday

Dear Don,

I agree with Ruth about the shots. I've had one every year for many years. Every year I get some sort of flu. This year I had a second shot for pneumonia - so I got pneumonia.

I could escape from the hospital after five days because there is a good health center here - I am doing a lot of sleeping and will soon be O.K.

My advice to you was for B12 Vitamine shots - I get 1000 units once a week and it really picks me up.

Florida is catching ~~really~~ cold weather, but my room on the south is flooded with sunlight. I have no desire to go out and will guard against

another relapse. The
hospital was a good one —
the breathing machine a
true boon — and the food
excellent. I even had ~~the~~
delicious steak — twice.

A note from a friend in
Winter Park says all gatherings
have been cancelled ~~for~~ the
duration of the illnesses.

Northerners probably bring
the virulent bugs. I got
mine in California. Nearly
two months since the first
hint of a head cold.

Enough !

Love

Marge

You may dear to phone me.
I went home by ambulance — so not
exactly virtual — but I am now.
M
