

Friday Aug 5, 1967

My dear Sam,

How dreadful about your car.
Times like that will make you
glad to be home again. How
quickly changes can come.
They are coming fast for me.

I will not go to Mexico.
Sidney has been, and still is,
quite sick. He got some sort
of flu and I am sure - the
thing David told me - that it
went into pneumonia. The
temp is being controlled by
big anti febriles - but I feel
without the wonder drugs he
would now be safely on the
other side. Someday they will
use these drugs only for people

with potential. I think
I am not upset or sad - but
afraid I can't eat - so I must
be. He has become my
child. I am glad to have

the apartment to plan for.
Dr Evans is wonderful. At 89
he said "Margie, I don't want
to live to get old."

At first I was disappointed
about Mexico - but the
invitation will be open. I
am now prepared with
vaccination and typhoid
shots - miserable reactions

from both. Have
a good time in the mountains.
Florida is hot too - but
seldom in the 90's - and
we have air conditioning.
Love
June 9th.
