

Aug. 15 - '67

My dear Dan,

Another crisis behind me. Sidney
has survived bronchial pneumonia -
you might call it one of the more doubtful
blessings of modern medicine - for without
it he would have slept peacefully away
in his fever. Now he must lie
there - tired and weak - and may
never be strong enough to get out of
bed again. He is refusing to eat
and looks like parchment stretched over
bones.

I am spending as little time as
possible alone. I think I have faced
the nursing home bit - and am strong
and brave - but, when I am
alone, I know I am not.

Having the apartment to plan
about and fix is my main project
as of now. It is good I have
the problems of Dr. Evans to
consider. At any other time I
would feel going over and over

the same bits of paper - old pictures -
old memories - as meaning less here -
but now it is as tho I am doing it
for Sidney.

Dr. Evans was a dentist
in Chicago and gave up his practice in

1934 - but there are still dental

instruments and old records.

I got him from the nursing home
every morning at 9:00 and take him
back at 11:30. We have made

progress - but it is painfully slow.

I admire him greatly - and he
calls me a blessing - He became
quite an artist these last years

in both painting and wood carving.

How ~~is~~ interesting it is to learn of
people's past lives - I should say

some people - and interesting people.

I hope you have had a
good vacation from the heat of
Rome. I hope that in coming
another car will materialize.

Only good things should come your
way.

Love
Lucy M -
