

Oct - '43

My dear Don,

I hope what I said about letters of reply not required - didn't make you think I don't want them. I hope you

are understanding enough to know

I only wanted to say I don't want you to feel sorry, a troublesome obligation. I do love your letters and they always give me a lift.

I have been thru a long troublesome illness - brought about by myself. Two years ago I started injections for allergies. Without realizing it - I reached the saturation point and have been thru a severe reaction period - It took a while to realize the cause of the dreadful sweats - low fever -

feelings of nausea. etc.

It has now been a month
since the last injection - as
my miseries are beginning to
ease off - but it has been rough.

I know now that my illness in
the spring was from the same
cause and not the flu. From
here on I will stick to Mother
nature and ^{make} no attempts to
better whatever is my natural
basic self. I truly feel his

been out of living. except
for the three weeks away when
I was free of discomforts. When
I go home I get the next batch
of serum - which was stronger.

I hope all is well with you
and Ruth. I would truly love
to see you both in your homeland.
Thank you for the suggestion.
Right now I feel as tho I never
want to leave the comforts of home,

but that too will pass.

We are beginning to feel
a touch of chill in the air,
and it is welcome after a long
hot summer.

I have no
plans for California, anytime
soon.

Now the boys are older
Gargie doesn't have the real need
for me - so my visits there
will be shorter. California will
never feel ~~to~~ me, as Florida
does, with roots.

Always with best wishes and love,

Marge.
